

PRO-INTEQ ENGINEERING AND CONSULTING COMPANY LIMITED

Mechanical, Electrical, Telecom & ICT, Civil & Building contractors, Equipments and material supply

P.O BOX 10839, Dar es Salaam

Email: prointeq.engineering@gmail.com

Mobile: +255 719303529,

Incorporation NO: 188222757

TIN NO: 188-222-757

COMPANY PROFILE

MESSAGE FROM MANAGING DIRECTOR

I feel honored to serve you as the Director of **PRO-INTEQ Engineering and Consulting Company Limited** as our company continues to contribute to infrastructure development through reliable engineering solutions in Mechanical, Electrical, Telecommunication, Civil Construction, and ICT sectors.

At PRO-INTEQ, we are dedicated to providing engineering solutions that are durable, secure, and reliable for our customers. We recognize that in today's environment, systems must operate accurately and consistently. Electricity must stay available, networks must remain linked, and structures must remain stable. This awareness is what shapes our core principle:

Engineering with honesty, ensuring reliability.

With accuracy, responsibility, and innovation, we make sure every solution we create and deliver fulfills the highest standards of durability, safety, and lasting performance.

Engineering Reliability

We are committed to the delivery of the highest standard of professional service within Tanzania, together with the development of business partnerships which are built on trust, quality, and mutual benefit. At PRO-INTEQ Engineering, we strive to achieve our goals in a way that is effective by focusing our efforts on our core values, our expertise, and our customers. Our main aim is to ensure we meet all our customers' requirements. We achieve this by structuring our activities into our teams of specialists, project administration, reliable sources of supply, and committed staff within all of our service sectors.

Our reputation has been built on the ability of our committed staff, with the systems to support us, to deliver efficient, timely, and top quality services to our customers.

We are customer-focused, customer-driven, and committed to providing a professional level of personalized engineering service to every client.

To our valued clients and partners, we look forward to continued cooperation in strengthening our business relationships, sharing knowledge, and working together towards a more reliable and promising future.

We invite you to experience our services and feel free to contact us at any time.

Thank you for your trust and support.

Eng Moses Prosper Odindo

Managing Director

PRO-INTEQ Engineering and Consulting Company Limited

Precision in every project

INTRODUCTION

PRO-INTEQ Engineering Company Limited is a Tanzanian private limited company registered under the Companies Act (Cap 212) as a company limited by shares.

The company was established with a clear objective: **to provide dependable engineering services** in Electrical, Telecommunication, Civil Construction, ICT, Mechanical, and General Supply sectors with a high level of professionalism, technical accuracy, and reliability.

PRO-INTEQ operates as a technical contractor and engineering service provider supporting infrastructure development for telecom companies, construction firms, government institutions, industries, and private organizations.

Our operations are built around one principle:

Precision in every project— that every task we undertake is executed with great attention to detail, a high level of accuracy, and strict adherence to professional standards. It reflects our commitment to quality, careful workmanship, and delivering correct and reliable results at every stage of the project.

PRO-INTEQ Engineering is positioned to be a reliable contractor and supplier for Government institutions, private organizations, and international contractors, especially in large Telecom, Industries, Electrical, and Civil infrastructure projects.

PRO-INTEQ Engineering individuals' expertise allows us to service a wide variety of customers from small to major enterprises. PRO-INTEQ Engineering has the necessary resources, capacity and experience to meet current and future customer requirements.

Management at PRO-INTEQ Engineering is confident that the company will continue on its successful path in future. The company's entrepreneurial spirit and its strict adherence to sound business practices will enable it to continue to enjoy its position as a leading and challenging innovator and emerging leader for many years to come.

OUR VISION

To be a benchmark engineering firm in Africa, recognized for delivering sustainable, innovative and high-impact infrastructure solutions that shape the future of industries and communities

OUR MISSION

To deliver integrated engineering and consulting services with excellence, safety, integrity, and technical precision while creating long-term value for clients, partners, and society.

CORE VALUE

- Quality workmanship
- Integrity and accountability
- Professionalism
- Safety and environmental care
- Customer satisfaction
- Cost efficiency through proper plan

COMPANY ORGANISATION STRUCTURE

OUR SERVICES AREAS

1. ENGINEERING CONSULTANCY SERVICES

PRO-INTEQ Engineering provides professional engineering consultancy services with strong expertise in electrical systems design, power systems, and infrastructure development. We offer design and consultancy services for the **generation, distribution, and utilization of electrical power** across residential, commercial, industrial, and institutional projects.

Our electrical design team works closely with architects, structural engineers, plumbers, and other consultants to deliver coordinated and efficient engineering solutions tailored to the size and nature of each project.

We provide customized engineering designs and practical solutions that address challenges such as harmonics, grounding systems, and transient voltage spikes to ensure safety, reliability, and system efficiency.

Structural and Electrical Design Coordination

Our electrical engineers work in close collaboration with architects and structural designers to ensure buildings and facilities are safe, functional, and energy efficient.

We are involved in:

- Selection of appropriate structural and electrical materials
- Preparation of technical drawings and blueprints
- Design of electrical, HVAC, plumbing, and office automation systems
- Integration of engineering systems into overall building design

Feasibility Studies and Analysis

PRO-INTEQ conducts feasibility studies for clients who wish to evaluate the technical and financial viability of proposed electrical installations and infrastructure projects before committing resources.

Our feasibility reports help clients to:

- Assess project value and expected benefits
- Understand cost implications
- Evaluate sustainability and carbon footprint impact
- Determine life cycle costs of installations

Project Management Services

PRO-INTEQ offers comprehensive project management services for electrical and infrastructure projects across commercial, industrial, retail, and institutional sectors.

Our project management team ensures:

- Proper project scheduling and planning
- Accurate cost forecasting and budgeting
- Avoidance of common construction and engineering risks
- Timely completion of projects within budget

Electrical Substation Maintenance

We provide maintenance services for electrical substations through periodic inspections, testing, troubleshooting, and performance checks to ensure reliable operation throughout the equipment life cycle.

Generator Systems Consultancy and Support

PRO-INTEQ provides expert consultancy and support for diesel and petrol generator systems, helping clients select suitable power generation solutions for domestic, commercial, and industrial use.

We support critical equipment such as:

- Relays
- Circuit breakers
- Transformers
- Switchgear and panels

Our solutions are designed to improve efficiency, reduce operational costs, prevent equipment failure, and ensure reliable performance of power systems.

2. ELECTRICAL WORKS

Electrical Engineering Works

As a flexible and constantly evolving engineering company, **PROINTEQ Engineering** provides complete electrical solutions through innovative design, professional installation, and reliable maintenance services. Our team of experienced and highly qualified electrical engineers delivers services that meet national and international engineering standards across industrial, commercial, telecom, and institutional projects.

We undertake electrical projects ranging from low voltage installations to high-voltage power systems, ensuring safety, efficiency, and long-term reliability.

Power Generation & Backup Systems

- General maintenance of diesel and petrol generators
- Generator installation and commissioning
- Power backup solutions for buildings and telecom sites

Power Transmission & Distribution

- Construction of power transmission lines up to **400kV**
- Installation of power transformers
- High voltage substation design, installation, commissioning, and project management (**33kV to 220kV**)
- Distribution board design and installation
- Power system consultation and design

Electrical Installations & Building Services

- Professional electrical installations
- Full building electrical fit-outs
- Electrical maintenance and corrective repairs
- General and periodic electrical inspections
- Electrical safety compliance
- Emergency lighting systems
- Fire alarm system installations

Industrial Electrical & Automation Systems

- Conversion of electrical systems to **Programmable Logic Controller (PLC)** and automation
- Motor and AC alternator rewinding
- Elevator installation
- HVAC electrical installations (Heating, Ventilation, and Air Conditioning)

Renewable Energy & Energy Efficiency

PRO-INTEQ promotes sustainable and energy-efficient solutions through:

- Solar power system design, installation, repair, and maintenance
- Solar power installation for telecommunication sites
- Energy Storage Systems (ESS)
- Low energy lighting solutions (LED)

2.1. Electrical Materials Supply Services

PRO-INTEQ Engineering supplies a wide range of high quality electrical materials and equipment to support electrical, telecom, industrial, and building projects. We source and deliver reliable products that meet engineering standards and project specifications for contractors, institutions, telecom operators, industries, and construction projects.

Our supply services ensure timely availability of certified electrical materials required for installation, maintenance, and infrastructure development.

Electrical Equipment and Materials Supplied, but

are not limited to:

Power Distribution Materials

- Distribution boards (DB) and panel boards
- Circuit breakers (MCB, MCCB, ACB)
- Switchgear and control panels
- Changeover switches and isolators
- Cable trays, trunking, and cable management systems

Cables and Wiring Accessories

- Low voltage and medium voltage power cables
- Control and communication cables
- Earthing cables and accessories
- Cable glands, lugs, ferrules, and connectors
- Conduits, trunking, and fittings

Lighting Systems

- Indoor and outdoor lighting fixtures
- LED lighting solutions
- Street lighting poles and fittings
- Emergency lighting systems

Power Backup and Generation Equipment

- Diesel and petrol generators
- Automatic Transfer Switches (ATS)
- Batteries and energy storage systems
- Solar power system components (panels, inverters, controllers)

Earthing and Lightning Protection

- Earthing rods and plates
- Earthing pits and accessories
- Lightning arrestors and protection systems

Transformers and Substation Materials

- Power and distribution transformers
- Transformer accessories
- Substation panels and protection equipment

Our Supply Advantage

- Quality-assured materials from trusted manufacturers
- Compliance with engineering and safety standards
- Competitive pricing and timely delivery
- Ability to supply in bulk for large projects
- Technical support in material selection based on project requirements

PRO-INTEQ Engineering ensures clients receive the right electrical materials to support safe, efficient, and reliable electrical installations.

3. TELECOMMUNICATION, ICT AND SECURITY SYSTEMS

PRO-INTEQ Engineering is a complete telecom and ICT infrastructure solutions company providing professional installation, asset management, maintenance, and consultancy services that support the success of wireless network operators, enterprises, institutions, and government facilities.

We assist our clients in designing, deploying, maintaining, upgrading, and managing responsible and sustainable telecom and ICT network assets. Our solution helps organizations optimize their efficiency, minimize operational costs, and ensures appropriate communication and security performance.

Our clients include mobile network operators, equipment manufacturers, corporate organizations, institutions, and various technology partners.

Telecom Infrastructure Project Management

PRO-INTEQ Engineering uses a structured and integrated approach in the management of telecom projects, which ensures proper coordination in terms of resource, communication, and teamwork management.

We have a thorough understanding of crucial factors in telecommunication infrastructure projects and manage them to deliver value to the entire project delivery chain.

Telecom Equipment Installation and Commissioning

Our team of experienced and accredited engineers provides high quality installation, testing, and commissioning services for telecom network equipment with a strong focus on quality, flexibility, and fast response time.

We carry out installation and integration of various telecom network elements including:

- Base Transceiver Stations (BTS)
- Base Station Controllers (BSC) and RNC integration
- Core network platforms
- Antenna and feeder line installations
- RF and Microwave (MW) antenna installations
- RF sweep testing and signal verification
- Transmission line installations
- Site acceptance testing and commissioning

Radio Call Services

PRO-INTEQ Engineering offers professional Radio Communication (Two-Way Radio) solutions for construction sites, security operations, industries, and institutions. We supply, install, and maintain handheld radios, base stations, antennas, and repeaters to ensure wide coverage and instant communications across project sites and facilities. Our radio solutions are helping to improve coordination, safety, and operating efficiency in situations where immediate and reliable communications are critical.

3.1. TELECOM INTEGRATED SITE MAINTENANCE

Telecommunication sites contain highly sensitive and expensive equipment that require continuous inspection, care, and maintenance to ensure uninterrupted network performance. Unexpected failures can lead to costly downtime and service disruption.

PRO-INTEQ Engineering provides comprehensive **Telecom Integrated Site Maintenance** services that combine preventive maintenance, corrective maintenance, and network support activities to ensure telecom sites operate efficiently and reliably at all times.

Our maintenance services are designed to support mobile network operators, tower companies, and telecom infrastructure providers.

Preventive and Corrective Maintenance

We conduct regular site inspections and scheduled maintenance to prevent equipment failure and respond quickly to any faults that may occur, ensuring minimal downtime and continuous network availability.

On-Site Bulk Fuel Delivery Services

PRO-INTEQ provides reliable bulk fuel supply and management services to telecom sites to ensure generators operate continuously without interruption. **Alternative Energy Solutions**

To improve reliability and reduce operational costs, we provide and maintain alternative energy solutions including:

- Solar power backup systems

- Generator and fuel tank installation

- Hybrid power solutions for telecom sites

Telecom Infrastructure Maintenance

We maintain telecom site infrastructure including:

- Equipment shelters and cabinets
- Cable management and routing
- Antenna structures and mounts
- Power systems and earthing
- Site fencing and physical condition

Site Janitorial and Environmental Services

Clean and well-maintained environments are critical for telecom equipment performance. We provide janitorial and environmental maintenance services to keep telecom sites clean, safe, and operational.

3.2. FIBER OPTIC SOLUTION

PRO-INTEQ Engineering provides professional Fiber optic solutions for telecom service providers, enterprises, institutions, and commercial facilities. Our services cover both **ground (outside plant)** and **in-building Fiber installations**, ensuring reliable highspeed data and communication networks.

We offer complete end-to-end Fiber optic implementation services from planning and design to installation, testing, and commissioning.

Planning, Survey and Design

Our Fiber team performs detailed planning and technical design including:

- Cable route mapping
- Civil work and site surveys
- Fiber network design and architecture
- Preparation of detailed Bill of Materials (BOM)

Regulatory Compliance and Right of Way We

assist clients in obtaining:

- Right of Way (ROW) approvals
- Regulatory permits required for Fiber deployment
- Coordination with relevant authorities and stakeholders

Civil Works, Trenching and Cable Laying

PRO-INTEQ undertakes all civil works related to Fiber deployment including:

- Trenching and duct installation
- Laying of Fiber optic cables (OFC)
- In-building Fiber routing and cable management

Splicing, Termination and Testing

We provide professional Fiber optic splicing and termination services followed by comprehensive testing to ensure optimal performance and signal integrity.

This includes:

- Fiber splicing and jointing
- Termination at ODF and patch panels
- Link testing using specialized testing equipment
- Commissioning of Fiber links

3.3. ICT AND SECURITY SYSTEMS

PRO-INTEQ Engineering provides professional ICT infrastructure and security system solutions that enable organizations to operate reliable, efficient, and secure communication networks. We specialize in structured cabling, network installation, IP telephony, wireless networking, and integrated security systems for offices, institutions, hotels, industries, and commercial facilities.

Our design and installation specialists combine advanced technology with high standards of workmanship to deliver modern, scalable, and well-organized network infrastructures tailored to each client's operational needs.

Structured Cabling System (SCS)

Structured cabling systems form the backbone of any reliable communication network. PRO-INTEQ Engineering designs and installs cabling infrastructure that supports voice, data, video, and multimedia systems within buildings and across facilities.

Our SCS services include:

- Data and voice cabling installation
- Network racks, patch panels, and cable management
- LAN and WAN infrastructure
- End-to-end design, installation, and testing
- System upgrades and maintenance

Our cabling solutions are designed with security, integrity, scalability, and adaptability to future Engineering.

Wireless Networking and Hotspot Solutions

We provide wireless networking solutions for offices, homes, hotels, and commercial environments.

Our services include:

- Office and building wireless network design
- Inter-building wireless connectivity
- Wi-Fi hotspot systems for hotels and internet cafés
- Supply, installation, and configuration of wireless equipment

IP & Hybrid PABX Systems

PRO-INTEQ Engineering provides installation, upgrade, and maintenance of IP PBX, Hybrid PBX, and VoIP-based telephone systems for offices, institutions, hospitals, hotels, and commercial buildings.

We supply and install:

- PBX systems and IP phones
- VoIP gateways and accessories

These systems enable advanced features such as:

- Auto-attendant
- Voicemail
- Call conferencing
- Call recording
- Extension networking
- Telephone usage reporting

Network Security and Firewall Solutions

We implement network security systems to protect organizational data and communication networks through:

- Firewall installation and configuration
- Anti-virus and endpoint protection systems
- Secure network architecture design

3.4. SECURITY SYSTEMS SOLUTIONS

In today's fast-growing world, the need for effective and reliable security systems has become essential for offices, institutions, industries, commercial buildings, and residential facilities. Protecting people, assets, information, and property is no longer optional — it is a mandatory requirement.

PRO-INTEQ Engineering provides advanced electronic security solutions designed to monitor, control, and protect facilities using modern digital Engineering. We design, supply, install, and maintain integrated security systems tailored to meet the specific needs of each client.

Our security solutions include CCTV surveillance systems, intercom systems, access control systems, time and attendance systems, gate barrier systems, biometric identification systems, intrusion alarms, and anti-theft systems.

CCTV Surveillance Systems

PRO-INTEQ installs modern CCTV video surveillance systems using high-resolution digital cameras and network video recorders to monitor activities within and around facilities.

CCTV systems help to:

- Monitor access to secure areas
- Prevent unauthorized activities
- Detect theft, vandalism, and criminal damage
- Enhance personal and property safety
- Enable remote monitoring and incident response

Access Control Systems (ACS)

We design and install access control systems that regulate and monitor entry of employees and visitors into restricted areas.

These systems use Engineering such as:

- Swipe cards and proximity cards
- PIN code keypads
- Biometric fingerprint and facial recognition devices

Our solutions can be integrated into existing infrastructure and can be deployed for single sites or multiple locations.

Intruder Alarm & Panic Alarm Systems

PRO-INTEQ installs intrusion and panic alarm systems that detect:

- Forced entry
- Unauthorized access
- Emergency or personal attack situations

These systems trigger immediate alerts and response mechanisms to ensure safety and security.

Time and Attendance Systems

We provide biometric and card-based time attendance systems that enable organizations to:

- Monitor staff entry and exit times
- Track attendance, breaks, and absences
- Generate accurate employee attendance reports
- Improve workforce discipline and accountability

Anti-Theft (Electronic Article Surveillance) Systems

For retail shops, supermarkets, and stores, we install anti-theft systems that help prevent loss of goods due to:

- Shoplifting
- Internal theft
- Fraud and shrinkage

These systems protect business assets and reduce financial losses.

OUR SERVICE APPROACH

PRO-INTEQ provides complete support across all ICT and security projects through:

CONSULTING

We assess client needs and propose customized technology solutions.

DESIGNING

We prepare tailored system designs and equipment layouts based on site requirements.

INSTALLATION

Our skilled engineers carry out professional installation and configuration of all systems.

Maintenance and After-Sales Support

We provide ongoing maintenance, routine inspections, and reliable after-sales service to ensure long-term system performance.

With strong emphasis on quality workmanship, proper system design, and reliable support, PRO-INTEQ ensures clients receive state-of-the-art ICT and security infrastructure that supports maximum operational efficiency.

4. CIVIL WORKS, TOWER ERECTION AND CONSTRUCTION SERVICES

PRO-INTEQ Engineering provides comprehensive civil engineering, tower erection, and construction services for public and private infrastructure projects, industrial facilities, telecom sites, and commercial developments. Our expertise covers large civil structures, roads, railways, pipelines, and telecom tower construction, supported by skilled manpower and modern construction practices.

We undertake both structural construction and labor-based civil works including environmental and site maintenance services.

Key Civil Engineering Services

- Construction of roads, bridges, interchanges, and railways
- Construction of dams, canals, irrigation schemes, and pipelines
- Tower erection and telecom site civil works
- Power stations and industrial civil structures
- Mining, marine, and petrochemical civil works
- Plants for material handling and storage □ Fluid distribution and storage structures
- Waste disposal systems and environmental works
- Grass cutting, culvert cleaning, road cleaning, and site waste management
- Engineering estimation and cost analysis

Building Construction, Housing and Property Development

PRO-INTEQ Engineering undertakes design, development, and construction of residential, commercial, and industrial buildings. We provide complete building solutions from foundation to finishing for both private and public sector clients.

Our experience includes construction of homes, cluster housing developments, commercial complexes, and real estate infrastructure.

Key Building Services

- Large commercial and residential complexes
- Retail developments and industrial premises
- Corporate buildings and institutional facilities
- Refurbishment, renovation, and remodelling works
- Housing development and property infrastructure

Mining Projects and General Supply

PRO-INTEQ supports mining and construction projects through supply of skilled labor, construction materials, and industrial minerals according to project and market requirements.

Supply Services Include

- Skilled and unskilled manpower supply

- Supply of sand, aggregates, gravel, reinforcement bars, steel, timber, marine boards, paints, gypsum boards, tiles, and related building materials

- Supply of industrial minerals such as coal, quartz, calcite, feldspar, clay, soapstone, magnesite, copper, bauxite, lead ores, gypsum ores, graphite ores, manganese ores, and related material

5. MECHANICAL WORKS

As a flexible and constantly evolving engineering company, PROINTEQ Engineering provides complete mechanical solutions through innovative design, professional installation, manufacturing and fabrications and reliable maintenance services. Our team of experienced and high qualified mechanical engineers delivers services that meet national and international engineering standards across industrial, commercial, telecom, and institutional projects.

We undertake mechanical projects including installation and maintenance ranging from HVAC, Escalator, elevator, and traveller, pumps and other heavy-duty machines. Mechanical Engineering in construction, industrial, and infrastructure projects often includes additional key areas such as:

- Piping and plumbing systems (for water, gas, fuel, and process fluids)
- Firefighting systems (sprinklers, hydrants, pumps)
- Boiler and steam systems
- Compressed air systems
- Industrial fabrication and welding
- Machinery installation and alignment (pumps, motors, conveyors)
- Maintenance and retrofitting of mechanical equipment.
- Machining processes

HVAC Systems

- Design, installation, repair, and maintenance of Heating, Ventilation, and Air Conditioning (HVAC) systems for residential, commercial, and industrial facilities
- Energy-efficient HVAC solutions, including ductwork, controls, and system integration
- Preventative maintenance and troubleshooting to ensure optimal performance and air quality

Escalator and Elevator installation

- Escalator installation, commissioning, and modernization for commercial buildings and public spaces.
- Elevator installation, including hydraulic and traction system, with safety compliance checks
- Regular inspections upgrades, and emergency repairs for escalators, elevators and travelers.

Industrial Mechanical & Automation systems

- Piping and plumbing installation for fluid and gas distribution
- Mechanical equipment maintenance including pumps, compressors and conveyors

- Conversion of mechanical system to automation using Programmable Logic Controller (PLC)

Renewable and Sustainable Mechanical Solutions

- Integration of mechanical systems with solar and hybrid energy setup
- Low-energy mechanical designs for sustainable building projects.

Multidisciplinary Project Works

We execute multidisciplinary projects involving structural, mechanical, and piping works, particularly for:

- Industrial plants
- Power stations
- Road and transport infrastructure
- Water treatment and distribution plants

Service Standards and Quality Approach

PRO-INTEQ Engineering adheres to strict quality and safety standards to ensure delivery of reliable and professional construction services.

Our service principles include:

- Use of high-quality construction materials
- Maintaining clean and organized work sites at all times
- Construction in accordance with approved drawings and contract specifications
- Full compliance with building regulations and statutory requirements
- Adherence to industry best practices
- Compliance with planning conditions where applicable
- Completion of projects to the satisfaction of clients and design teams

6. HEALTH, SAFETY AND ENVIRONMENT (HSE)

PRO-INTEQ Engineering recognizes that Health, Safety, Environmental protection, and safeguarding of assets are essential for efficient operations and the welfare of our employees, clients, and stakeholders. Our HSE policy is built on the understanding that safe operations depend not only on technically sound equipment and facilities, but also on competent personnel and a proactive safety culture.

We are committed to maintaining the highest standards of health, safety and environmental practices across all our engineering, installation tools, and work procedures meet engineering telecom, electrical, civil, and building projects. safety standards.

Our HSE Policy

PRO-INTEQ Engineering is committed to:

- Maintaining safe working conditions during equipment installation, construction, and engineering activities by providing proper tools, equipment, and personal protective gear designed for safety.
- Ensuring that all telecommunications engineering kits, installation tools, and work procedures meet engineering safety standard.
- Monitoring the health and wellbeing of employees regularly to ensure they are not adversely affected by their work environment. -
- Establishing and maintaining effective emergency response procedures and resources to minimize the impact of accidents at work sites.
- Conducting regular testing of safety systems, tools, and procedures to ensure effectiveness.
- Setting and monitoring measurable HSE performance indicators through internal audits, periodic reviews, and third-party audits to

identify areas for improvement.

PRO-INTEQ promotes a culture where safety, environmental responsibility, and respect for human life are integrated into every project and activity we undertake.

PRO-INTEQ Engineering — Precision in every project
